PROFILE

Human Performance Specialist with a master's degree and hands-on experience in elite sport performance environments. Background in sports science, strength and conditioning, data collection, movement analysis, research, and athlete testing. Formerly a collegiate athlete with a multidisciplinary approach to performance, skills in biomechanics, and proficiency in Excel and statistical analysis.

EDUCATION

Lubbock Christian University **August 2024 – August 2025**
Master of Human Performance
- Cumulative GPA: 4.0

Lubbock Christian University **August 2020 – August 2024**
Bachelor of Exercise Science, Minor in Business

EXPERIENCE

University of Michigan Football **August 2026 - Present**
Data Collection + Data Analyst Intern
- Collect athletic data using Catapult GPS technology, VALD ForceDecks, ForceFrame, Nordbord, and other sports science technologies to evaluate workload, readiness, and potential injury prevention strategies.
- Support the director of sports science in cleaning and analyzing data that is collected.
- Utilize Power BI, Excel, and Python to communicate athletic data to the sports performance team.
- Assist in the development of data recording workflows to improve the efficiency of testing.
- Contribute to an injury prevention research project by monitoring data and reading scholarly articles to identify trends associated with injury risk.

Exos **May 2025 - August 2025**
Sports Performance Intern
- Assisted in delivering performance sessions for 20–40 athletes per day across youth, collegiate, and professional levels in a high-performance environment
- Conducted and assisted with performance assessments, including Functional Movement Screens (FMS) and sport-specific testing protocols
- Supported data tracking, reporting, and athlete monitoring using Excel and performance management systems
- Collected data from elite-level athletes to compare and create a strength program based on the numbers.

Lubbock Christian University **August 2020 - December 2024**
Collegiate Soccer Player
- Competed at the collegiate level as an all-around player and teammate, while striving for academic growth.
- Developed discipline, leadership, and communication skills while always being open to constructive criticism and coachability.
- Gained applicable athletic performance knowledge while returning to sport from anterior cruciate ligament reconstruction.

Skills & Certifications

Skills: Leadership; Movement Analysis; Research; Data Collection; Strength and Conditioning; Power BI, Excel, Statistical Analysis, Research, Catapult GPS, Evidence Based Decision Making
Certifications: CPR/AED, XPS
